

Instructions - Format the USB on
MacOS in 2 simple steps for
compatibility with Microsoft
Windows and Android

SafeM

aps

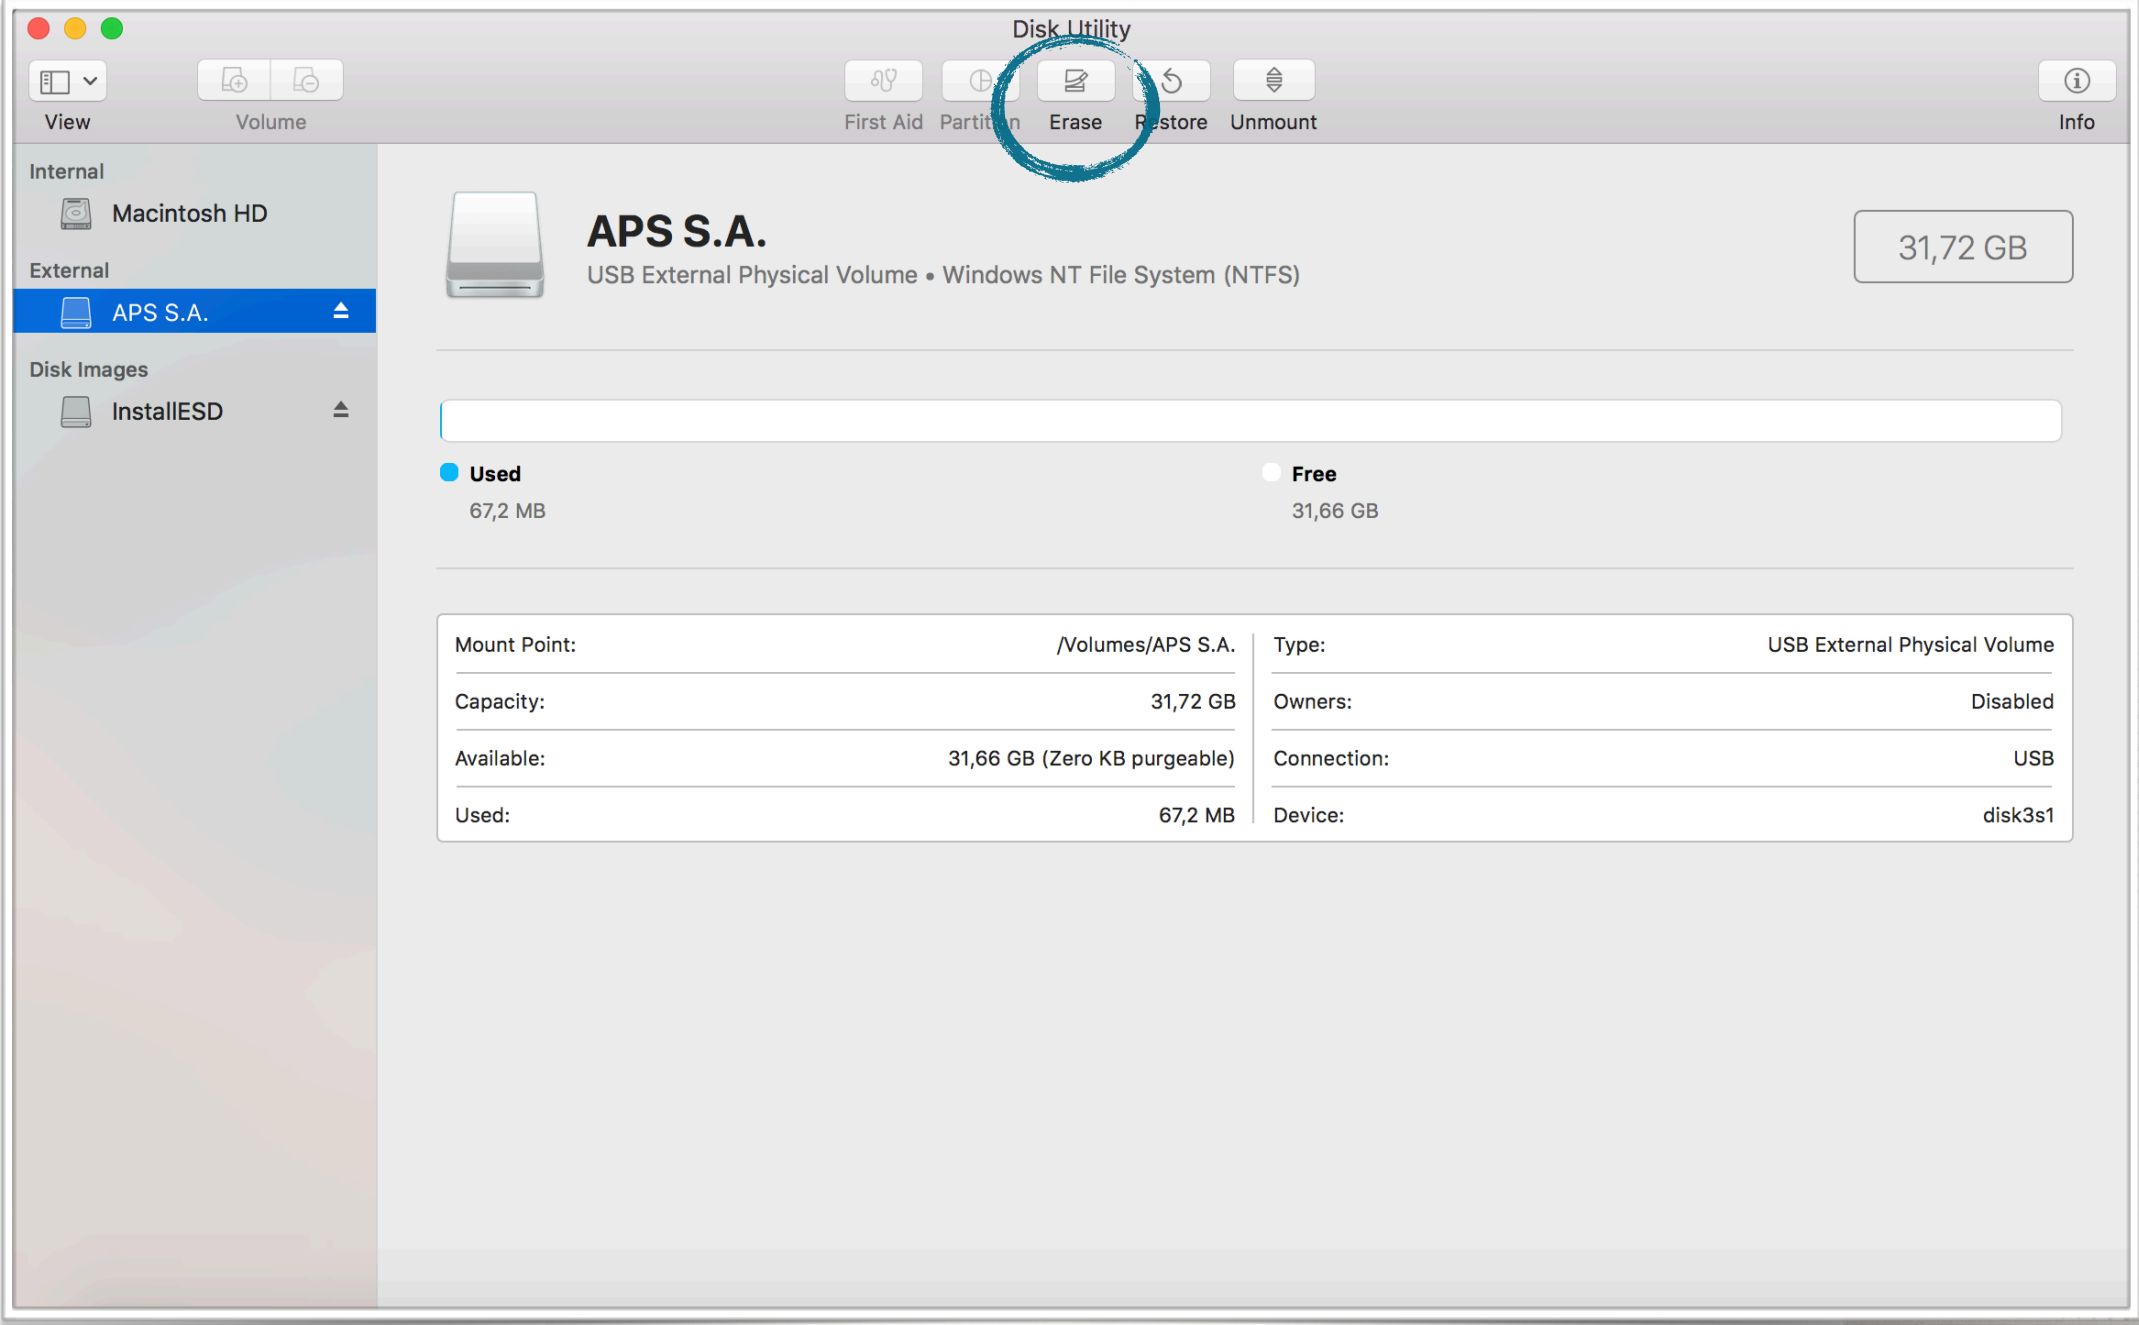

SAFE M

Step 1: Go to <Disk Utility>

Finder > Applications > Utilities > Disk Utilities

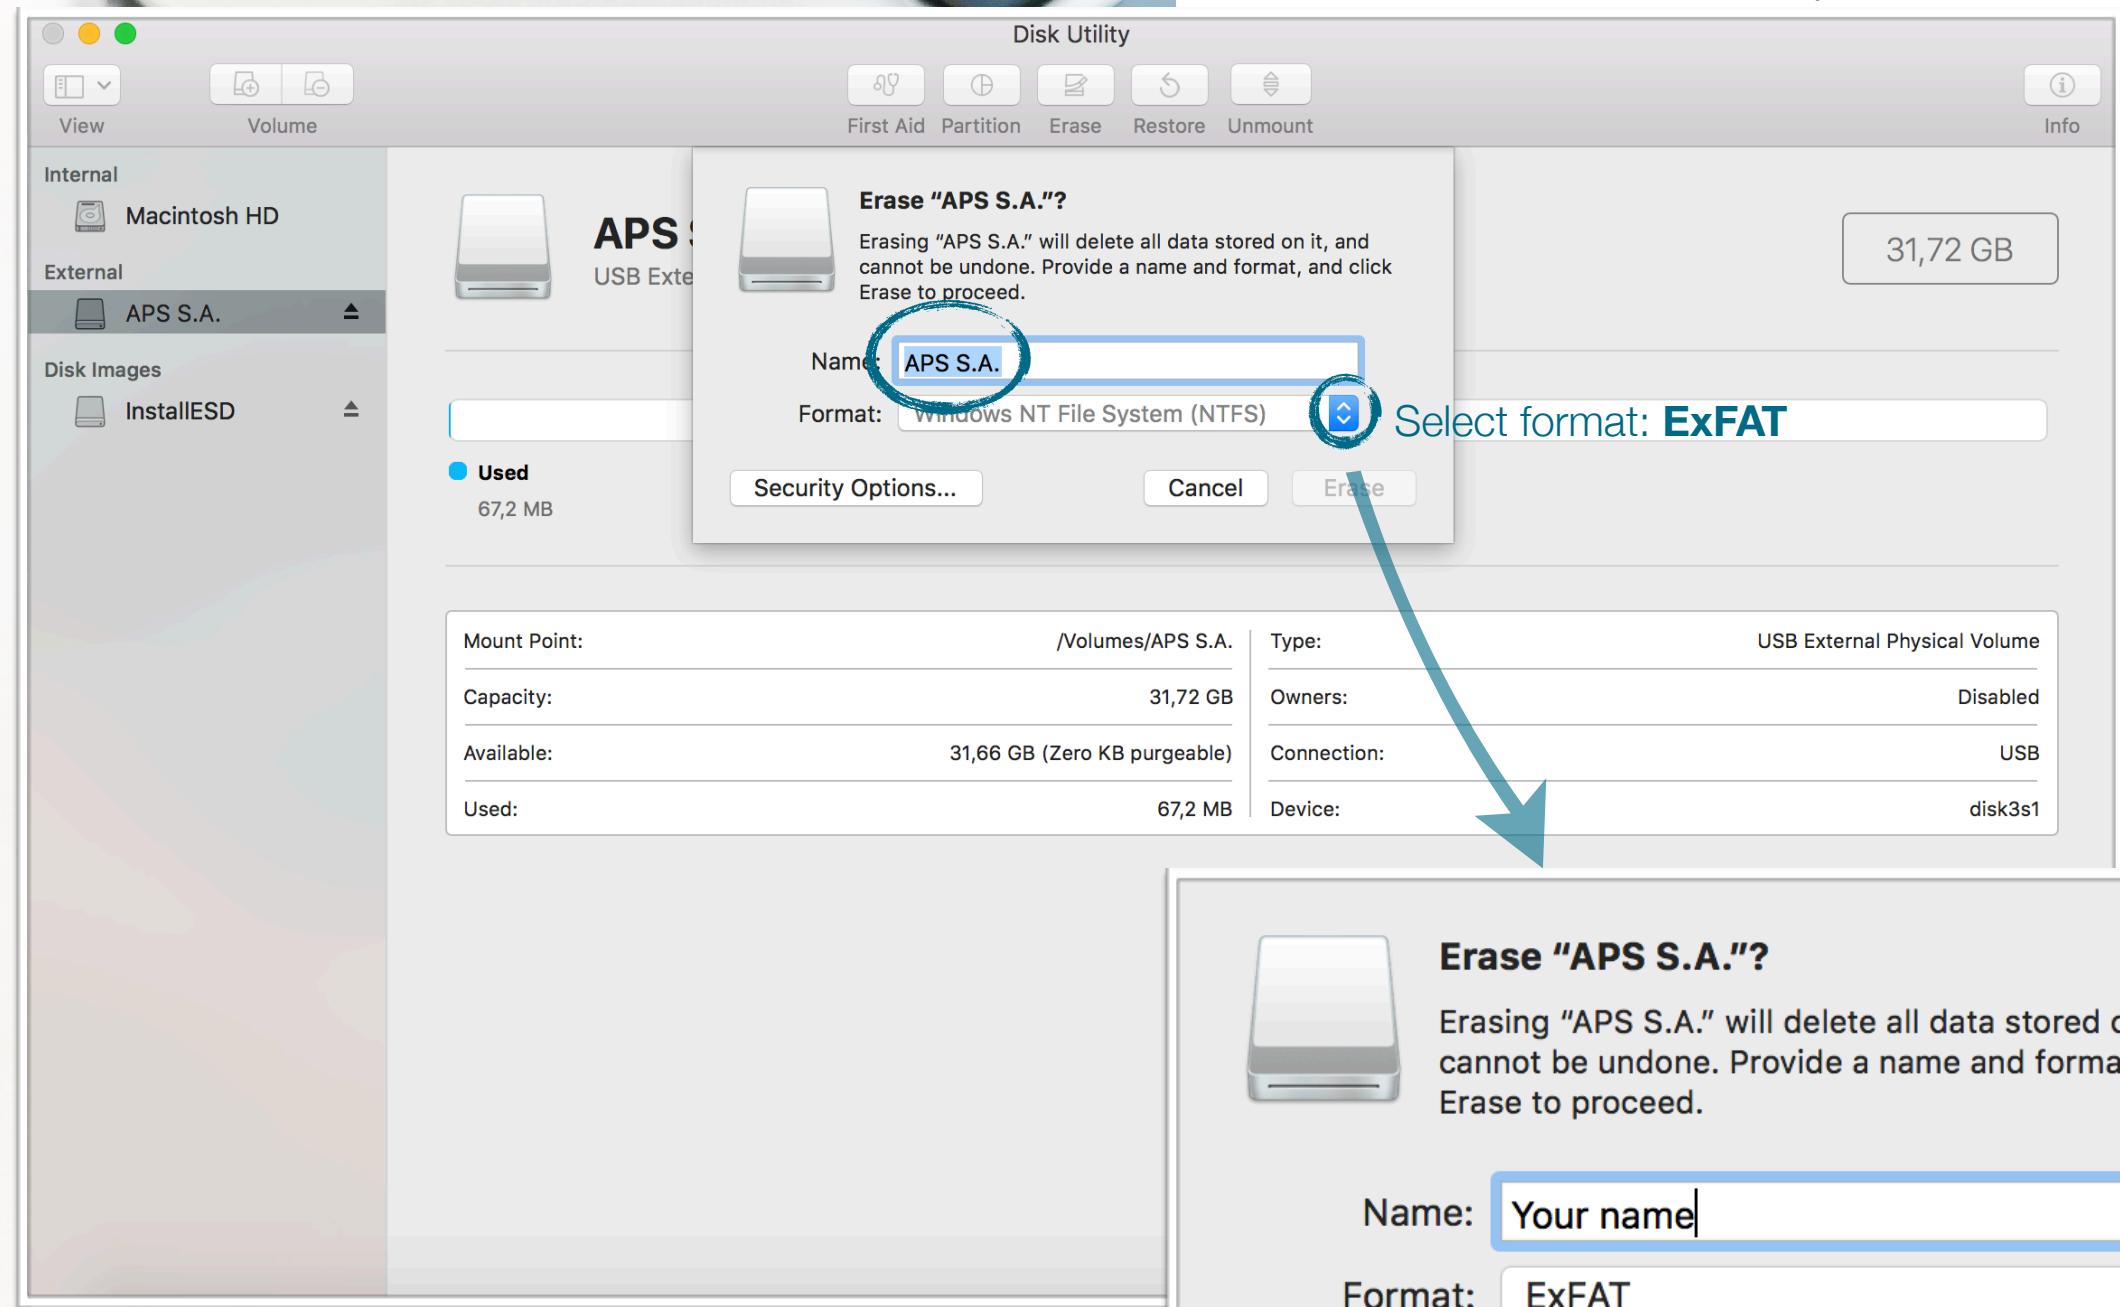

Click <Erase>

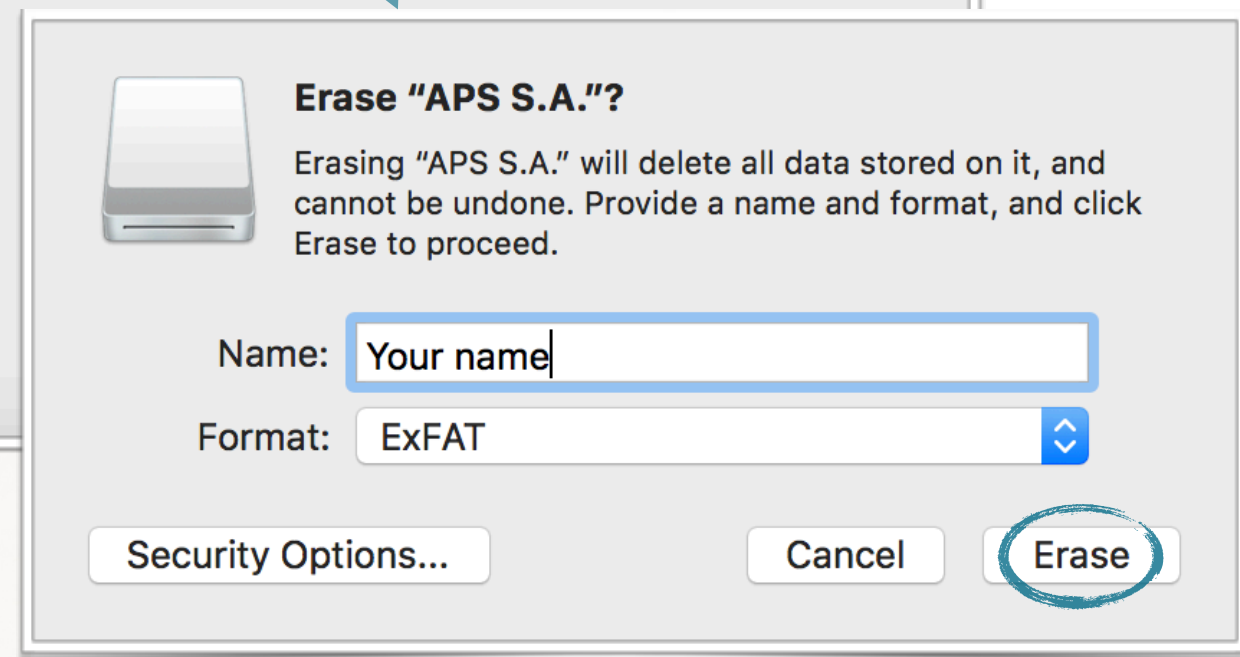

Step 2: Change name

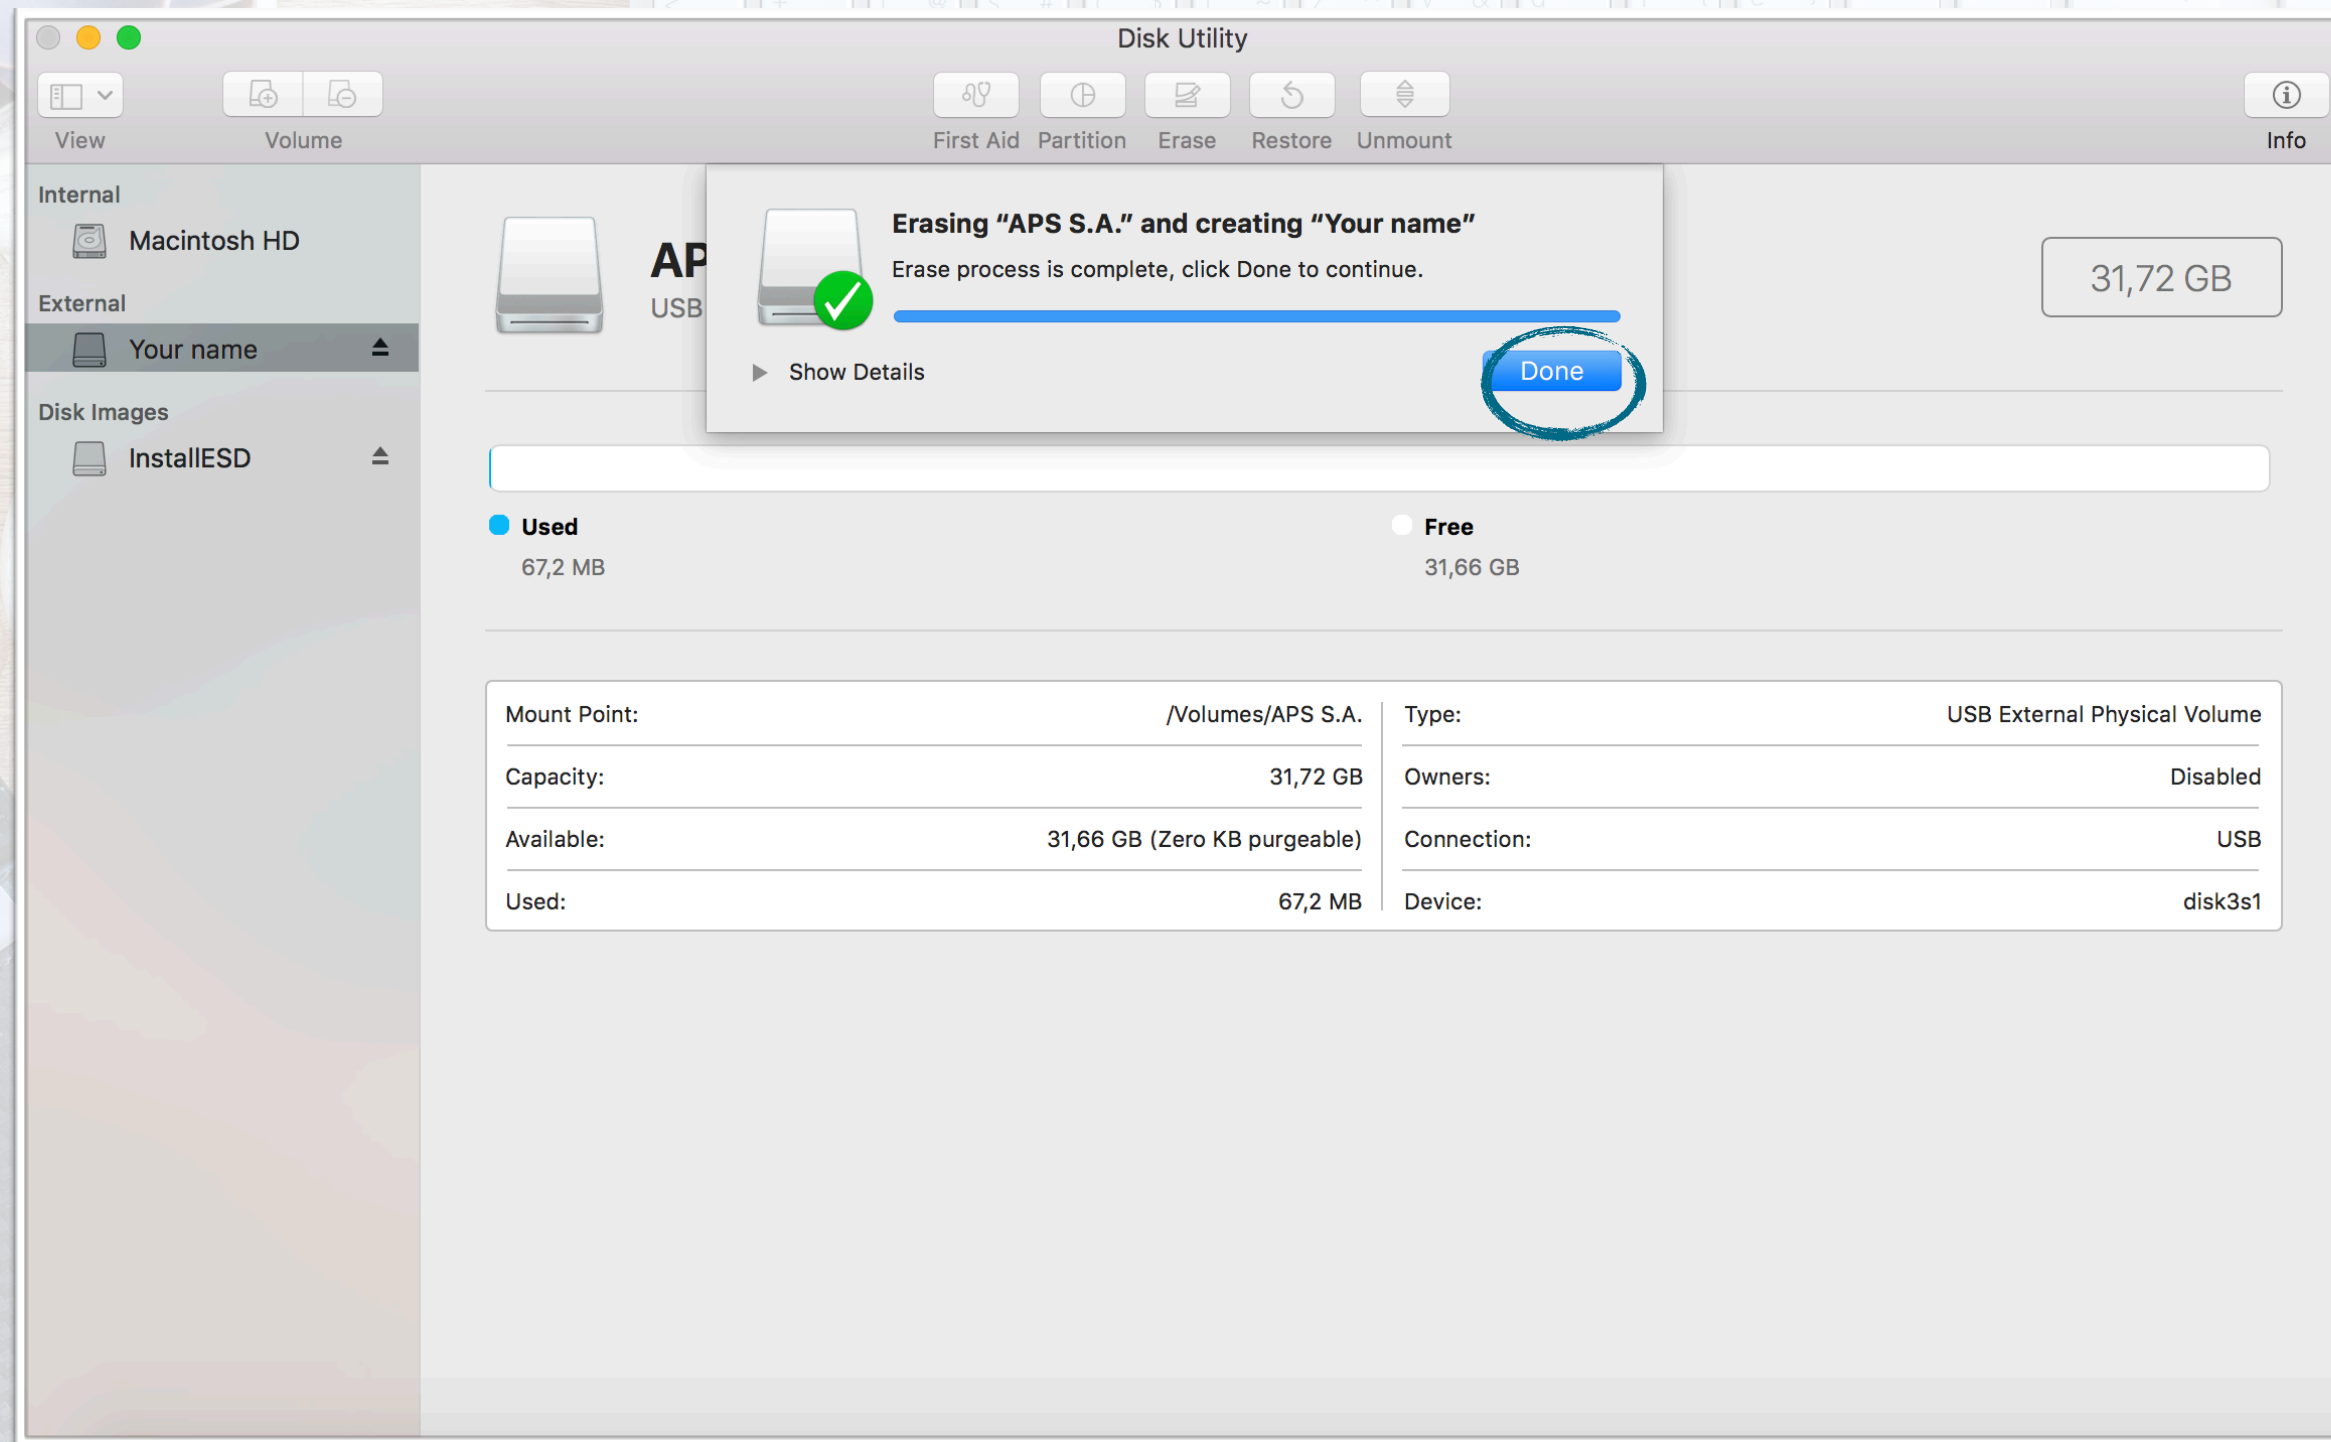

Change name to personalise your USB flash drive.

Select 'ExFat' to format then, click 'Erase'

When you've personalised your USB and selected <ExFAT> as your format, click <Erase>

Congratulations! It's done. You can now use your SafeM on
MacOS, Microsoft Windows and Android
